

In today's distinctive homes, the demand for the "open" has architects and builders increasing the number of windows in their designs. Along with many benefits, however, come new problems that can be elegantly solved with Sivoia QED (Quiet Electronic Drive).

With Sivoia QED, you can adjust all the shades in your room instantly to banish harsh glare, protect your valuables from fading and enjoy an improved view outside. At the touch of a button, control an entire room or even a whole home full of roller shades, Roman shades or draperies. Tall, dramatic windows can expose your home to UV damage, energy losses and privacy concerns. Now, even two-story windows can be a convenient part of your overall lighting design.

Sivoia QED lets you recapture the benefit of every window in your home. Enhance privacy and peace of mind while protecting your furnishings and artwork from ultraviolet damage. Enjoy elegant transitions as Sivoia QED adjusts multiple shades or draperies, in exact union, and in perfect alignment. With sun filtering fabrics that you can adjust effortlessly, your home will be beautifully comfortable in any light. Regardless of how many windows you are controlling, Sivoia QED shades move smoothly and stop together for perfect alignment within 1/16" of an inch. The ultra-quiet movement of shades and draperies will help create the perfect retreat from your busy life. Wake up and let the sunshine in without getting out of bed. At the touch of a button, discreetly close the draperies to enjoy a movie or create the privacy of what you want, anytime.

Sivoia QED gives you complete control of shades and draperies with precision, reliability and elegance. With its built-in microprocessor, Sivoia QED provides superior performance and advanced features never available before. In 1961, Lutron introduced the world's first electronic (solid-state) dimmer. From that point forward, Lutron innovations transformed the world of lighting controls. Today, with more than 75 utility and 40 design patents, and more than 10,000 products shipped to 80 countries worldwide, Lutron continues to lead the way with innovation and quality.
